Skills

- **Languages**: C++, Java, JavaScript, Python
- **Frameworks/Libraries**: React, Node.js, Bootstrap, Tkinter
- **Web Technologies**: HTML and CSS
- **Databases**: MySQL, MongoDB
- **Tools**: Git, REST APIs
- **Soft Skills**: Analytical and Critcal Thinking, Learning Agility, Attention to Detail, Emotional Intelligence

Freelance Experience

- **Lepo – Cloud-based Inventory Management System**: Jan 2025 – Mar 2025

  • Engineered a full-stack inventory platform using React/Next.js, Node.js, and PostgreSQL, enabling seamless multi-device access and 3-warehouse management, improving process efficiency by 35%.
  • Deployed on AWS (EC2, S3, Lambda, CloudFront), ensuring 99.9% uptime, secure file storage, automated backend workflows, and 40% faster load performance.
  • Integrated AI-based stock prediction, voice-enabled commands, and real-time WebSocket monitoring, reducing manual tracking time by 50% and improving decision-making accuracy.
  • Implemented QR/Barcode scanning for automated stock-in/out and item tracking, cutting data entry errors by 60% and improving operational speed.
  • Developed offline mode with auto-sync, smart reorder alerts, and expiry monitoring, enhancing usability in remote environments and reducing stock wastage by 25%.

  Tech Stack: React, Next.js, Node.js, Express.js, PostgreSQL, AWS EC2, AWS S3, AWS Lambda, CloudFront, Web Sockets, TensorFlow (AI), QR/Barcode SDK, JWT Authentication.

Projects

- **XCL – Text Editor Application | GitHub** Jun 2025 – July 2025

  • Designed and developed a modern text editor application using Python's Tkinter library with an interactive GUI for file handling and text manipulation.
  • Implemented key features such as file open/save, search and replace, and light/dark theme toggle for better usability.
  • Enhanced user experience with responsive design using ttk styling and real-time UI updates.

  Tech Stack: Python, Tkinter, ttk, GUI Design, File Handlin

- **Cloudwise – DevOps AI chatbot | GitHub** Apr 2025

  • Designed and built a modern cloud-based bot interface using React, TypeScript, and Vite, focusing on clean UI workflows and smooth user interactions.
  • Implemented reusable, modular components with Tailwind CSS and Shadcn-UI to deliver a consistent and responsive interface across devices.
  • Enhanced performance with optimized rendering, real-time UI updates, and well-structured state management for seamless user experiences.
  • Established a scalable frontend architecture suitable for cloud integrations, future automation workflows, and bot-driven features.

  Tech Stack: React, TypeScript, Vite, Tailwind CSS, UI/UX Development, Frontend Architecture

- **Alazea – Smart AI powered Plant Identification Website | GitHub** Jan 2024 – Mar 2024

  • Developed a plant identification website using Bootstrap for responsive front-end design and MySQL for efficient data storage and retrieval.
  • Integrated PHP for backend processing and server-side logic to handle user requests seamlessly.
  • Built APIs to connect the database with the web interface for smooth data exchange and real-time plant recognition results.

  Tech Stack: HTML, CSS, JavaScript, Bootstrap, MySQL, PHP, REST APIs

TRAINING

- **Mastering Data Structures and Algorithms with CPP and Java** | **Boord Infinity** Jun 2025 – Jul 2025

  - Gained in-depth understanding of core DSA concepts using Java, C++, and Python, strengthening algorithmic thinking and cross-language proficiency.
  - Implemented and analyzed key data structures (arrays, linked lists, stacks, queues, trees, graphs) and algorithms (sorting, searching, recursion, dynamic programming) with optimized performance.
  - Enhanced problem-solving skills through hands-on coding challenges and competitive programming tasks.
  - Designed and developed a **Text Editor desktop application using Python**, featuring GUI, file handling (open/save), search & replace, and light/dark theme toggle.
  - Applied object-oriented programming principles to modularize the project, improve code readability, and ensure maintainability.

  Tech Stack: Java, C++, Python, Tkinter, OOP, File Handling, Algorithms & Data Structures, GUI Development

CERTIFICATION/CERTIFICATES

- AWS Cloud Practitioner | AWS Jan 2025 – May 2025
- Mastering Data Structures and Algorithms | Boord Infinity Jun 2025 – Jul 2025
- Natural Language Processing | NPTEL Aug 2024 – Oct 2024
- Cloud Computing | NPTEL Aug 2025 – Oct 2025

ACHIEVEMENTS

- **Grand Finalist - Smart India Hackathon**: Sep 2025

  Among 50 participants in the Final Division of hackathon
- **Microsoft Achievers Club , Lovely Professional University** – Technical Lead Sep 2023 - Present

  Led and mentored a team in organizing technical workshops, hackathons, and projects to enhance student engagement in emerging technologies.
- **Competitive Programming & Coding Achievements – LeetCode** Aug 2023 – Present
  - Secured **Global Rank 181** in **LeetCode Weekly Contest 489**, competing among 41,000+ participants worldwide.
  - Achieved a **LeetCode Contest Rating of 1795**, placing in the **Top 7.89% globally**.
  - Solved **332+ Data Structures & Algorithms problems** (including 29 Hard), demonstrating strong problem-solving and algorithmic proficiency.

EDUCATION

- **Lovely Professional University** Phagwara, Punjab, India
  Bachelor of Technology - Computer Science and Engineering; ***CGPA: 8.25*** *Since Aug 2023*
- **Saint Francis School, B.Deoghar** Deoghar, Jharkhand, India
  Intermediate; ***Percentage: 87%*** *Apr 2021 - Mar 2022*
- **Saint Francis School, B.Deoghar** Deoghar, Jharkhand, India
  Matriculation; ***Percentage: 93%*** *Apr 2019 - Mar 2020*
